

BE FESTIVAL 2013

@ AE HARRIS
 Ground Floor Plan
 Northwood Street Level

The main indoor spaces available for performances are Africa, Europe and Australia, but we are also able to programme outdoor work, promenade theatre and site-specific performances. We have even programmed theatre in the festival restaurant. The AE Harris factory has a range of atmospheric spaces, each with its own opportunities.

Africa

An end-on studio space for 250 audience members, with full blackout and black dance floor

Europe

A performance space with no seating and a concrete floor, suitable for promenade theatre and installations. A simple lighting rig and full black-out is available.

Stage blocks can be installed so that the audience can be raised.

Australia

A large space with a very high ceiling and red carpeted floor - suitable for installations and performances that don't require black-out.

We also have:

Asia

An informal space filled with sofas, tables and a small stage – suitable for concerts, DJs and cabaret performances.

Americas

BE FESTIVAL's restaurant. Tables will be set. Suitable for performances taking place during dinner or promenade work that don't require black-out.

The courtyard

A circular outdoor space within the factory venue.

The street

The factory is located on a private street, and during the weekend we can place site-specific performances here.
